In the Circuit Court of Iron County, The State of Missouri, at the relation and to the use of B. P. Burnham, Col-lector of the Revenue of Iron County, Missouri,

Williams and Robert A. Callison, James A. Smith, William P. McCracken, Jean F. Perry, I. P. Bodgers, Peter Kennel, Peter Kurnel and Julius H. York, if Inving, or the unknown comsorts, helra, devisees and assigns of Robert Callison, James A. Smith, William D. McCracken, Jean F. Perry, L. P. Rodgers, Peter Kennel, Peter Kurnel and Julius H. York, if they be dead, Detendants. (Action to Enforce Lien for Tuxes.)

Now at this day comes the plaintiff, B. P. Burnham, Collector of the Revenue of Iron County, Missouri, and lies his petition and affidavit, setting forth, among other things, that the defendants, Robert A. Callison, James A. Smith, William D. McCracken, Jean F. Perry, L. P. Rodgers, Peter Kennel, Peter Kurnel and Julius H. York, if Itving; or the unknown consorts, helrs, devisees and assigns of Robert A. Callison, James A. Smith, William D. McCracken, Jean F. Perry, L. P. Rodgers, Peter Kennel, Peter Kurnel and Julius H. York, if they be dead, are non-residents of the State of Missouri, and that they cannot be served with summons in said state.

Plaintiff states that the defendants, Robert A. Callison, James A. Smith, William D. McCracken, Jean F. Perry, L. P. Rodgers, Peter Kurnel and Julius H. York if they be dead, the summons in said state.

Plaintiff states that the defendants, Robert A. Callison, James A. Smith, William D. McCracken, Jean F. Perry, L. P. Rodgers, Feter Kennel, Peter Kurnel and Julius H. York have not been heard of for many years; that plaintiff is not informed whether they be living or dead; that, if they be dead, their helm, or, if they ded leaving a will, their devisees are interested in the subject matter of this petition; that the names of such heirs or devisees, or both, cannot be inserted herein because they are unknown to plaintiff; that the said Robert A. Callison, James A. Smith, William D. McCracken, Jean F. Perry, L. P. Rodgers, Peter Kennel, Peter Kurnel and Julius H. York, their said heirs and devisees have, by descent or devise, succeeded to the said interest and estate

MEETS DEFEAT

BAY OF RIGA BATTLE COSTS TEUTONS ELEVEN WAR-SHIPS.

SUPERDREADNAUGHT IS SUNK

Von Moltke, With 1,107 Sallors on Board Is Destroyed-Once Visited United States-Russians Think Tide Has Turned.

London,-A dispatch to the Central

News from Petrograd says: "The president of the Duma has announced that the Germans lost the battle cruiser Moltke, three cruisers and seven torpedo boats in the Riga

This announcement of the president of the Duma as sent by the corres-

pondent follows: "In the Riga battle, the Germans lost one superdreadnaught, the Moltke, three- cruisers and seven torpedo

The German battle cruiser Moltke was a vessel of 23,000 tons and carried in ordinary times a complement of 1.107 men. She was a sister ship of the famous Goeben, which became part of the Turkish navy after the commencement of the war, and was rechristened Sultan Selim.

The Moltke was 590 feet long and was armed with 10 11-inch guns and 12 6-inch guns and 12 24-pounders. In addition, her armament included four 20-inch torpedo tubes. She was built in 1911 and had a speed of about 28 knots.

The Moltke was in the battle with the British fleet in the North Sea last January, when the German armored cruiser Bluecher was sunk. In 1912 the Moltke was in the German squadron which visited the United States to return the visit of the United States battleship squadron at Kiel during its trip around the world. The cost of the Moltke was about \$12,-

Victory Is Turning of Tide. Petrograd.—The statement made in the Duma by the president of the chamber, M. Rodzianko, that the German fleet had been defeated at Riga with the loss of the battle cruiser Moltke and three other cruisers and seven torpedo boats, elicited unbounded enthusiasm and was accompanied by touching scenes. The people regard the reported victory as the turning of the tide in favor of Russia.

MOVE TO HONOR SCIENTIST

morial Over Grave of Prof. James Orton.

Far away in South America, on small and unfrequented island in Lake Titicaca, stands a little crumbling tombstone which marks the last resting place of a once noted American explorer, Jrof. James Orton. Only in the hearts of his surviving relatives and of Vassar graduates of some forty years ago is his memory enshrined, and until recently comparatively few even of these remembered how Orton lost his life and where his body lay. They have now, however, learned something of the particulars of his death and the location of his grave, and a movement has been started among the Vassar alumnae of the eary seventies and soon a marble shaft will rise to mark the spot where

James Orton sleeps. An article by Edward Albes in the Monthly Bulletin of the Pan-American Union served to awaken the memories of those who had forgotten, and struck a responsive chord in the

hearts of the elder Vassar women. Orton, who was born at Seneca Falls, N. Y., in 1830, and educated at Williams college and Andover Theological seminary, entered upon his career as a scientist in 1866, when he was appointed instructor in natural sciences in Rochester university. In 1867 a scientific expedition to the equatorial Andes and the River Amazon was organized under the auspices of the Smithsonian institution, and Professor Orton was selected as its leader. As a result of this expedition many hitherto unknown specimens of natural history were collected, and today form portions of the collections in the museums of such well-known depositories as the Smithsonian institution at Washington, the Philadelphia Academy of Natural Science, the Boston Society of Natural History, the Peabody Academy of Science, and Vassar college, while the bulk of the collection was purchased

by Ingham university. Upon his return to the United States Professor Orton was offered the chair of natural history at Vassar college in 1869, with which institution he remained until his tragic death in 1877. In 1873 he made a second journey across South America from Para up the Amazon to Lima, Peru, and to Lake Titicaca, making valuable ethnological collections of Incarial relics. In 1876 he organized a third expedition, with the object of exploring the tric locomotives in use weigh 270 Great Beni river, a branch of the tons each and two of them attached to Madeira, one of his companions be- a 4,000-ton train recently carried it ing Dr. Edwin Ruthven Heath, dis- with ease up a two per cent grade at coverer of the River Heath in South | the rate of fourteen miles an hour, a America, who is still living in Kansas | rate twice that attained by the most

This expedition reached the mouth used on the system. of the river, where most of the equipment and supplies were lost. Orton and his few companions made the terrible 600-mile journey back to La incredible hardships, but on crossing Lake Titicaca on the way to Puno 25, 1877, from the exposure incurred. Esteves island by sympathetic friends, and some years ago Scotch engineer named Crighton built with his own hands the rough monument which now marks the grave.

Time Didn't Matter. A prominent lawyer tells this tale of the hills of Kentucky. He had been in Jackson during the hearing of a

big land case, and after the strain of several weeks in the courtroom had decided to take a trip up in the mountains and enjoy the quieting influences of the hills. He traveled the paths and narrow mountain roads till he found himself, at the end of several days' journey, about forty or fifty miles from the railroad. It was about noon, the lawyer judged, for his watch had run down and he could not be exact. But in the midst of this deep contemplation the lawyer came upon an old darky sitting upon a bowlder longside the road.

"What time have you?" he asked of the old darky. "Well, suh, boss, the old watch says

was the reply. "Is that sun time or railroad time?" again questioned the lawyer. "What difference does that make? One am about as fer from here as the

Circus Acrobat, "Smashed to Bits," Is Being Scientifically Knitted Together.

Like a vessel of fragile china, shattered to pieces and then carefully patched together so that no eye can distinguish the cracks, Miriana Cortez, a Spanish circus performer, who was crushed and fractured in a score of places all over his body on April 30, has been knitted together by the doctors of St. Luke's Homeopathic hospital and is now almost well again. Remarkable in the annals of surgery has been this man's strange case, involving months of the most painstaking work and racking suffering on the part of the patient. That he recovered at all from his frightful njuries she's about ten minutes to twelve," is remarkable; if he should regain all his physical faculties, as the surgeon say he will, it will be almost miracu-

Cortez was an acrotat in the circus. He performed his most thrilling acts on top of a long pole, which was balanced on a support, attached to a broad leather belt, worn by the strong man of the group.

On the night of April 30, before a large crowd, Cortez was performing his act when his feet slipped. He went crashing to the ground.

Both his legs were fractured, the right leg in the thigh and the left leg just above the ankle. His left collarbone was also fractured and his nose broken. His right arm was jolted out of its socket, and his left arm crushed under him. His head was bumped in reveral places. Internally several organs were thrown out of place and four ribs were fractured.
